Lashes and Brows

Tamara Dutta uses your skin type and hair colour to create natural colour combinations that enhance the look of your eyelashes and eyebrows, resulting in a perfect natural look. Eyelash tinting is beneficial for people who want a natural look, but who are sensitive to make-up or are too busy to apply make-up daily. It is ideal for people who wear contact lenses, as it eliminates the discomfort of applying mascara.

Tips

You should avoid rubbing the eye area before and after tinting. If possible, you should not put contact lenses back in for the rest of the day. Although the dye is removed, some residue may remain.

This will wash off naturally shortly after application.

You should not apply make-up or receive any other eye treatments for at least 24 hours after the tinting treatment.

Your eyebrows by Tamara Dutta

Tamara Dutta uses a very gentle wax which removes the hair follicle with minimal pain. The eyebrow shape is drawn on prior to the treatment to ensure it is perfectly suited to your face.

TAMARA DUTTA SIGNATURE HAIR REMOVAL

Tamara Dutta's waxing method is beneficial to women with sensitive skin, as it is less painful and reduces the chance of ingrown hairs.

After applying her homemade clay mixture to your skin, Tamara Dutta uses two different kinds of wax.

The first, a warm thick wax, is applied in a lavish layer using the tips of her fingers. It removes all the hair. The second, is a warm creamy white wax spread evenly over the surface of the skin before being covered with a cloth strip. This strip is pulled off in a quick and gentle motion against the direction of hair growth. This removes the wax as well as the hair.

After the waxing is finished, an elixir oil or smoothie balm will be gently applied to your skin to complete the treatment.
